Explore our catalog of marble, granite, quartzites, and semi-precious stones

We are committed to delivering quality and innovation.

Arquitelar is a company founded in 2020 by two entrepreneur brothers, Brazilians, who have been in the stone business for more than 15 years. In order to reuse cutouts of raw materials used in high-end works, they began to develop pieces that could be used as luxury decoration.

Each piece is unique and caters to the qualities and textures of each mineral.

We work with modern machines. 95% of all water used in the process is reused. Our energy is 100% clean generated by photovoltaic panels.

Each piece that reaches our customer is conceptualized, designed, and produced by our professionals, with the aim of valuing the natural raw material.

To be special, a piece needs to be made by talented hands. To develop true masterpieces, Arquitelar relies on specialized professionals with their skilled hands who mold pieces with excellence in every detail.

With a line designed meticulously for personal care, Arquitar has thought of every detail to elevate the intimate moment of feminine beauty to an unparalleled experience, celebrating the strength that resides in every woman

To deliver the best design for decorative pieces sculpted in the most luxurious materials, Arquitelar searches Brazilian quarries for minerals that can translate their essence

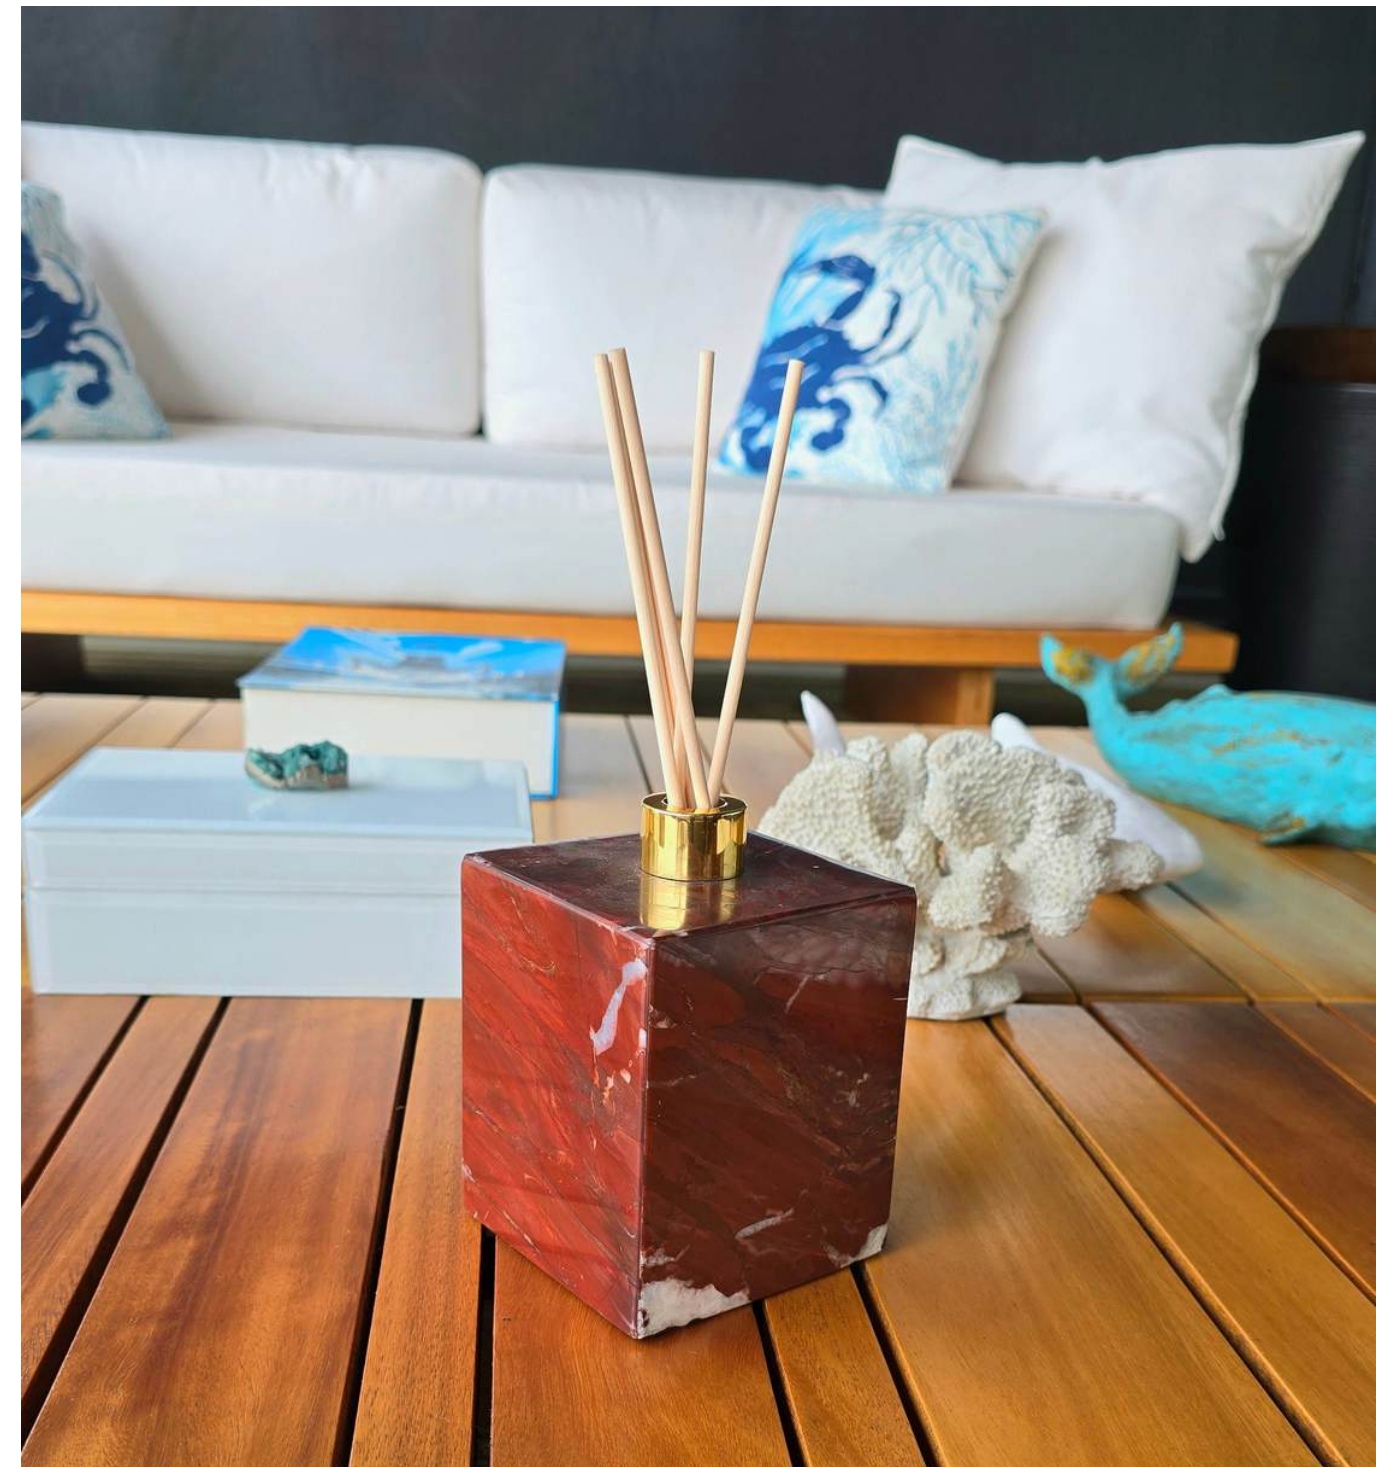

A dark, circular, handmade stone plate with a white napkin and a copper fork on a marble table. The plate has a rough, natural stone texture. The napkin is folded and placed on the left side of the plate. The copper fork is visible in the bottom right corner. The background is a light-colored marble surface.

Made of natural stone and handmade, Arquitelar's pieces are designed in every detail to elevate the intimate moment. A unique and timeless piece that embodies aesthetics and functionality.

Arquitelar connects art and design incorporating stone and glass, integrating the artistic expression of talented Brazilian designers and architects.

Each piece we deliver to our customer is carefully thought out, designed and produced by our professionals. Our modern machines guarantee high-quality cuts and finishes, allowing professionals to perform manual finishing, piece by piece, with excellence.

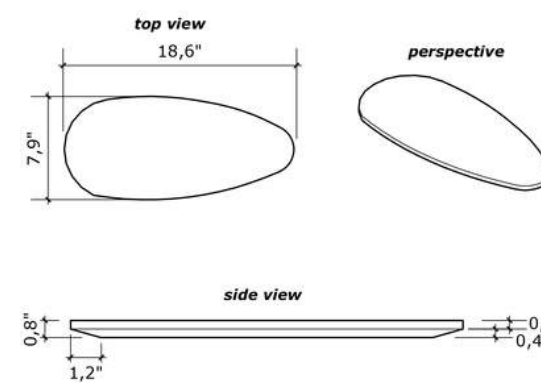

Our goal is to value the natural raw material and offer the best design in decorative pieces, ensuring exclusivity and sophistication for our customers.
